## DETAILED ACTION

### *Election/Restriction*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10, 17-24, and 29-31, drawn to fiber optics, classified in class 385, subclass 901.1.
  - II. Claims 11-13, drawn to method of making fiber optic substrates, classified in class 65, subclass 376.
  - III. Claims 25-28, and 32-46, drawn to method of detecting analyte, classified in class 435, subclass 6.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of fiber optics of Group I and method of making fiber optic substrates of Group II are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects.
3. Inventions of Groups I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the

Art Unit: 1634

product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the method of detecting analyte of Group III can be practiced with fiber optics of Group II or by mass spectrometer or radioactive methods or by spectrophotometer.

4. Inventions of Groups II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of method of making fiber optic substrates of Group II are not disclosed as capable of use together with method of detecting analyte of Group III and they have different modes of operation, different functions, or different effects.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Robin Silva on May 15, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CAR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CAR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1634

application. Any amendment of inventorship must be accompanied by a request under 37 CAR 1.48(b) and by the fee required under 37 CAR 1.17(I).
